Application No.: 10/658236 Docket No.: UC0013USNA

Page 2

Amendments to the Specification

Please amend the last partial paragraph on page 2, lines 35-39, as follows:

"When reflectivity of a layer is being configured to achieve low L_{background}, the range of thicknesses (d₁-d₂) for the layer can be determined by:

$$2\eta d_1 \left[\cos(\theta) + \cos(\phi)\right] = (m+1/4)\lambda$$

(Equation 1)

$$2\eta d_2 \left[\cos(\theta) + \cos(\phi)\right] = (m+3/4)\lambda$$

(Equation 2)"

Next, the final, partial, paragraph on page 10, lines 31-38, should be amended as follows:

"Reflectivity [[or]] of a thickness of a single layer can be determined by the equation below:

 $2\eta d \left[\cos(\theta) + \cos(\phi)\right] = (m+1/2)\lambda$

(Equation 5)

wherein,

 η is the refractive index of the selected material at a specific wavelength (λ);

d is the thickness of the layer;

 θ is the angle of incident radiation;"

At page 11, please amend the indented paragraph at lines 19-20 as follows:

"
$$2\eta d_1 \left[\cos(\theta) + \cos(\phi)\right] = (m+1/4)\lambda$$

(Equation 1)

$$2\eta d_2 \left[\cos(\theta) + \cos(\phi)\right] = (m+3/4)\lambda$$

(Equation 2)"
